## MESSAGE

It is a great pleasure and inspiring experience to host the 19<sup>th</sup> Science Council of Asia Conference, held with the theme " Research and Innovation for Sustainable Development in Asia" in Nay Pyi Taw, Myanmar.

This conference is particularly timely as all Member States are unanimously supporting research and innovation to achieve the Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda.

A comprehensive range of the conference sessions reflects a very topical agenda as it provides a wonderful platform and opportunity for several experts, academia, scholars and researchers to exchange their break-through ideas, profound knowledge and invaluable experiences.

I sincerely hope this conference will help to identify ways to bring forward the transformative sustainability agenda and better align research and innovation policies with the SDGs, as set out in the United Nations Agenda 2030 for sustainable development.

To all delegates, I would like to suggest that we adopt innovation in science, technology, engineering and mathematics as integral elements of the strategies for SDGs. I would like to request you to produce action-oriented outcomes of the conference and keep supporting research and innovation for sustainable development in Asia.

Before I conclude, I wish all delegates and participants an enjoyable stay in Myanmar.

Thank you.

## MESSAGE

Millennium Development Goals (MDGs) came to an end in December 2015; certain agenda of MDGs had been left unfinished. In 2015, UN General Assembly adopted the post 2015 Development Agenda and set Sustainable Development Goals (SDGs). The 2030 Global Development Agenda came into effect on 1<sup>st</sup> January, 2016 with the prospect of covering the five aspects: People, Planet, Prosperity, Peace and Prosperity. The approach to SDGs can be initiated through a different angle. For instance, People: End Poverty and Hunger in all forms and ensure dignity and equality; Planet: Protect our planet's natural resources and climate for future generations; Peace: Foster peaceful, just and inclusive societies; Prosperity: Ensure prosperous and fulfilling lives in harmony with nature.

Living beings inherited the earth, the only planet in the solar system, in which all known life forms can flourish. Human beings are the most intelligent species on earth. Throughout history, they try to change their environment to suit their needs and satisfy their desires. Among the continents, Asia happens to be the most populous region in the world. China and India, each with one billion plus population, have emerged as economic powers. Japan, Korea, Taiwan, and ASEAN TEN too witnessed economic growth. Inventions and innovations contributed to industrial revolutions. The fourth forthcoming inventions of IT and AI are expected to change traditional modes of manufacturing, transportation and urban amenities.

In 21<sup>st</sup> century, research across various countries in Asia highlight inter-linkages between natural resources and sustainable development goals along with the impact of climate change. The human society is seeking ways to safeguard human's wellbeing and to guarantee the sustainable use of resources. At the same time, it also tries to conserve the environment from natural calamities like floods, earthquakes, volcanic eruptions, drought, etc. so that our future generations will be inherited with green and peaceful environment.

I, on behalf of Myanmar Academy of Arts and Science, would like to express my deep appreciation to all those involved in making the conference a success. Special mention needs to be made to SCJ which co-hosted the SCA19 conference with MAAS for their guidance, support, co-operation and coordination. We fervently believe that the conference will provide our guests a cordial atmosphere for sharing experiences and exchanging views. The deliberations from this conference are expected to bring into light, effective means and ways for resolving common issues people are currently facing in Asia and elsewhere.

**Dr Thet Lwin**  
President of MAAS

## MESSAGE

I am pleased to announce that the 19th Science Council of Asia (SCA) Conference is held in Nay Pyi Taw, Myanmar. First of all, I would like to express my sincere gratitude to Myanmar Academy of Arts and Science (MAAS) for its enormous efforts to prepare for this Conference. I also would like to express my deep appreciation to Member Organizations and SCA Secretariat for their cooperation and contribution in organizing this Conference and all the people who support it.

The theme of the 19<sup>th</sup> SCA Conference is “Research and Innovation for Sustainable Development in Asia”. As you might already know, the purpose of SCA established in 2000 is “to facilitate scientific cooperation in Asia towards the progress in science and sustainable development of the region”. With this purpose, SCA has contributed to society through the collaboration with academies in the region. Under such circumstances, “Transforming our world: the 2030 Agenda for Sustainable Development” with the 17 Sustainable Development Goals (SDGs) and 169 targets was adopted at the UN General Assembly in 2015. Since then, the efforts to realize the sustainable development in which a key principle is “no one will be left behind” have started at global level. We must continuously and collaboratively address a wide range of issues facing us since they are so challenging in the sense that human beings have never experienced them before.

The 19<sup>th</sup> SCA Conference is held for 3 days and nearly 180 presentations (oral and poster) are scheduled. I am delighted to know that we have received many applications exceeding our expectation. It indicates a high level of interest in this Conference’s theme, “Research and Innovation for Sustainable Development in Asia”. In the Conference, there are four (4) sub-themes that are discussed in their respective sessions. The main theme and sub-themes of the Conference have been carefully selected in order to inspire scholars and researchers in Asia to undertake interdisciplinary researches in partnership to contribute to the realization of the 17 SDGs.

This Conference is an advantageous opportunity to build a network of scholars in and outside the country. I am sure that there would be abundant outstanding discussions at this Conference.

**Professor Hiroshi Yoshino**  
Secretary General / Treasurer of SCA
